Xuemei Yang

Work Address: School of Earth and Planetary

Sciences, Building 314, Room 168

Email: xuemei.yang@postgrad.curtin.edu.au

Brief Summary

The aim of the project is to calibrate the sedimentary, burial, thermal and tectonic history of a rift basin, using actual realistic 3D models of the basin made in Petrel (Schlumberger) software, to constrain the theoretical deterministic models made in Badlands/Underworld. The experimental design will estimate and evaluate the most important controlling variables, produce the associated statistical equations, and test many of the accepted theoretical equations for basin development.

Education: M.Sc. in Geology, Curtin University, 2014-2015; B.Sc. (Hons) in Petroleum Geology Engineering, China University of Petroleum, Beijing, 2009-2013.

Research interests: 3D basin modelling; Burial thermal history; Petroleum Geology

Thesis title: Realistic and Theoretical 3D Modelling of the Sedimentation, Burial, Thermal and Tectonic History of the Gippsland Rift Basin.

Supervisors: Prof. Greg Smith, Prof. Chris Elders and Dr. Jane Cunneen
