# 2017 TIGeR CONFERENCE:

“Time-scales of Geological Processes”

The aim of this 3-day conference is to promote progress at the leading edge of this topic through presentations and open-forum discussion.

We will focus on key aspects of the time-scales of:

- terrestrial planet formation and evolution
- orogenesis and metamorphism
- metasomatism and fluid flow
- crystal growth in nature
- element transport on short and long spatial scales
- ore formation
- weathering and related topics.

The total number of participants will be limited to about 80-100, to facilitate active participation and open discussion. So register early to avoid disappointment.

## SPEAKERS INCLUDE:

Jay Ague (Yale, USA)  
Robert Anczkiewicz (Krakow, Poland)
