2016 TIGeR CONFERENCE

Rock alteration in the upper crust:
Element mobility and concentration

26-28 September, 2016
Curtin University, Perth
PROGRAM

Make tomorrow better.

scieng.curtin.edu.au

The aim of this 3-day conference is to promote progress at the leading edge of this topic through presentations and open-forum discussion.

We will focus on key aspects of:

- rock hydration and carbonation: length and time scales
- element mobility and enrichment
- mineralisation
- enhanced alteration: in situ recovery
- environmental remediation
- reactions and transport in the critical zone
- geomicrobiology/biogeochemistry

The total number of participants will be limited to about 80-100 to facilitate active participation and open discussion, so register early to avoid disappointment.

THE AGENDA

The aim is to have short presentations (20 minutes for keynote speakers, 10 minutes for other talks) focusing on specific issues for later discussion. Afternoon poster sessions will provide further discussion time. The detailed schedule will be sent out after the registration period.
